Introduction.

As you're well aware the more places you're in, the more chances anyone is going to find you, your products and services.

But let's face it, for most of us being 'a one man or woman band', there's only so much you can do without burning yourself out or spreading yourself too thin.

This where today's report is going to be invaluable to you.

In it I'm going to show you how I..

- Create a blog post
- Create social media images
- Create a video
- Create content for a future podcast
- And more

...just by working with one single piece of content. A simple email.

Yes, you read right, an email.

Don't believe me? Then keep reading. Because in the next few pages I'm about to show you how to create a multitude of original content with an email, just like I do.

Step 1 - How To Write A Daily Email

What Else Can You Do?

Want to further your reach? Here's a few easy ways to do it without adding to your workload.

Bundle Your Content Into A Report

There's nothing stopping you from bundling a month's emails/blog posts together and creating a short report, ebook, or Kindle book with them. Not only can you use it as a lead magnet - to build a list with, but even giving it away free can make you money - as long as you leave the affiliate links intact inside it, that is. If you're not sure, read the blog post below for ideas.

[Here's a blog post showing how to give away content and still make money off of it.](#)

Put Your Video On More Locations Than YouTube

You know what's not going to make you money or grab traffic? A video left on your hard drive, that's what. Now that you have that MP4 video, what's stopping you from putting it on Twitter, Facebook, Tumblr, or anywhere else? Nothing. Open all those tabs on your browser and you can easily knock this out in a matter of minutes.

Expand Your Reach With Onlywire

If you're using Wordpress, add the Onlywire plugin can get your content in front of more people without doing anything more. There is a free and paid version of their service, but even the free service can be very helpful.

[Click here to sign up to Onlywire.](#)

Distribute Your Content On Autopilot With IFTTT

Like Onlywire, (IF This Then This) allows you to spread your content quickly and easily. Unlike Onlywire however, you create 'applets' that do specific actions. For example you can connect your Wordpress blog to your Facebook page, your Instagram account to Twitter (including showing the image and not the link Instagram gives you), and many more options.

All you have to do is give the applet permission to connect and share your content. Once done, one posting of an image, or posting to your blog, means that all your social media account and platforms get it sent to them at the same time.

[Click here to watch me connect my Instagram account with my Facebook page.](#)

And There You Have It...

How to go from one simple email all the way up to multiple versions of that same content on different platforms. Other than creating your content, the longest part (in the beginning) is creating and setting up your social media and YouTube thumbnail templates, but after that it's a simple matter of swapping in and out text and images and you're good to go.

If you'd like to know more about how I create those daily emails that featured in the first video [click here](#)
